Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's Representatives proposed amendments to claims 31, 37 and 44. The limitations proposed for addition to claims 31 and 37 include the closing station of claims 32 and 38, wherein the limitations of the closing station are further amended to incorporate the closing means of Applicant's invention (i.e. angle plate, clamp block, support post, push rod). Examiner agreed that such an amendment would overcome the prior art of record, however, an additional search of the art would be required as new issues would be presented. Applicant's Representatives also proposed amending claim 44 to include the limitations of claim 45, while arguing the significance of the passageway and pin within the mounting post of Applicant's invention. Applicant's arguments were persuasive in defining Applicant's invention over the prior art. It was concluded that the combination of the limitations of claims 44, 45 and 47 would be required to sufficiently define Applicant's invention over the prior art, thereby putting said combined claims in condition for allowance. See attachment of proposed amendments submitted for interview purposes.
